| 1. | The Poiss   | son's ratio of a material is 0.4. If a    | force  | is applied to this material, there is a |
|----|-------------|-------------------------------------------|--------|-----------------------------------------|
|    | decrease    | in cross sectional area by 2%. The perce  | entage | e increase in its length is:            |
|    | (A)         | 0.25%                                     | (B)    | 0.5%                                    |
|    | (C)         | 2.5%                                      | (D)    | 3%                                      |
| 2. | The differ  | ence between LST and EST is called:       |        |                                         |
|    | (A)         | Activity                                  | (B)    | Event                                   |
|    | (C)         | Float                                     | (D)    | Critical path                           |
| 3. | Identify t  | he method which is not a LPP techniqu     | ie:    |                                         |
|    | (A)         | Graphical method                          | (B)    | Transportation problem                  |
|    | (C)         | Simplex method                            | (D)    | ABC analysis                            |
| 4. | Roving in   | spection is a kind of:                    |        |                                         |
|    | (A)         | Key point inspection                      | (B)    | Floor inspection                        |
|    | (C)         | Fixed inspection                          | (D)    | Final inspection                        |
| 5. | Which of    | the following is an inversion of double s | slider | crank chain?                            |
|    | (A)         | Whitworth quick return mechanism          | (B)    | Reciprocating compressor                |
|    | (C)         | Rotary engine                             | (D)    | Scotch yoke mechanism                   |
| 6. | The size of | of an abrasive grain is termed as:        |        |                                         |
|    | (A)         | Grit                                      | (B)    | Grade                                   |
|    | (C)         | Structure                                 | (D)    | Orbit .                                 |
| 7. | The amou    | ant of money paid to a worker in cash fo  | or the | effort put by him is called:            |
|    | (A)         | Real wage                                 | (B)    | Nominal wage                            |
|    | (C)         | Living wage                               | (D)    | Fair wage                               |
| 8. | In pig iro  | n percentage of carbon varies from :      |        |                                         |
|    | (A)         | 0.1 to 0.5                                | (B)    | 0.5 to 1                                |
|    | (C)         | 1 to 5                                    | (D)    | 5 to 10                                 |
| A  |             | 3                                         |        | IPTO1                                   |
|    |             |                                           |        |                                         |

| 9.  | The produ  | action of flat vertical surfaces on | both sides o                 | f a workpiece is called :                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

41. Which of the following matrix does not have multiplicative inverse?

(B)  $\begin{bmatrix} 3 & 2 \\ 2 & 3 \end{bmatrix}$ 

(C) 
$$\begin{bmatrix} 2 & 3 \\ 4 & 6 \end{bmatrix}$$

(D)  $\begin{bmatrix} -1 & 0 \\ 3 & 1 \end{bmatrix}$ 

42. The value of sin (120°) is:

(A) 1

(B)  $\frac{\sqrt{3}}{2}$ 

(D)  $\frac{1}{2}$ 

43. The slope of the straight line 2x - 3y + 1 = 0 is:

(A)  $\frac{2}{3}$ 

(B)  $\frac{-2}{3}$ 

(C) 
$$\frac{3}{2}$$

(D)  $\frac{-3}{2}$ 

44. Which of the following straight line is parallel to the line 3x + 4y + 1 = 0?

(A) 3x + 4y - 1 = 0

(B) 7x + y = 0

(C) 
$$4x + 3y + 1 = 0$$

(D) 4x - 3y + 1 = 0

45. The line 3x + 4y - 12 = 0 cuts the X axis at:

(A) (4, 3)

(B) (4, 0)

(D) (0, 4)

46. The derivative of  $\log(\sec x + \tan x)$  is:

(A)  $\sec x - \tan x$ 

(B) tan x

(C) 
$$\sec x + \tan x$$

(D)  $\sec x$ 

47. Slope of the curve  $y = \sin(2x)$  at  $\left(\frac{\pi}{4}, 1\right)$  is:

(A) 1

(B) -1

(C) 0

(D) 2

104/2014

8

A

- 48. If  $\begin{vmatrix} 2 & 3 & 1 \\ x & 4 & 7 \\ 0 & 1 & 2 \end{vmatrix} = 0$ , then the value of x is:
  - (A)  $\frac{5}{2}$

(B) 3

(C) 5

- (D)  $\frac{2}{5}$
- The coefficient of  $x^3$  in the expansion of  $\left(x+\frac{2}{x}\right)^r$  is:
  - (A) 49

(B) 84

(C) 40

(D) 26

- **50.** If  $\frac{dy}{dx} = 2x$ , then y is:
  - (A)  $x^2 + c$

(B)

(C)  $x^3 + c$ 

(D)

- 51.  $Lt\left(\frac{x^2+7x-18}{x-2}\right)$  is:
  - (A) 11

(B) 0

(C) 7

- (D) 2
- The area of the region bounded by the line x y = 0, x axis, x = 0 and x = 2 is:
  - (A) 4 sq. units

2 sq. units (B)

(C) 12 sq. units

- (D) 6 sq. units
- The function  $y = x^2 + 6x + 1$  is decreasing at:
  - (A) (1, 8)

(B) (-1, -4)

(C) (0, 1)

(D) (-4, -7)

- 54.  $\int_{0}^{\frac{\pi}{2}} \sin\left(\frac{\theta}{2}\right) d\theta \text{ is :}$

(B) 2

(A)  $\sqrt{2}$  (C)  $2-\sqrt{2}$ 

(D) 2+√2

A

104/2014 [P.T.O.]

**55.** 
$$Lt \frac{x^2 + 3x}{x + 3x^2}$$
 is:

(A) 3

(B) 1

(C) 0

(D)  $\frac{1}{3}$ 

56. The number of terms in the expansion of  $(x+2)^{33}$  (x-2)<sup>83</sup> after simplification is:

(A) 32

(B) 0

(C) 17

(D) 33

57. If  $Cos(x) = Sin(x + 40^\circ)$ , then the value of x is:

(A) 10°

(B) 5°

(C) 25°

(D) 1°

58. If  $x = t^2 - 1$  and  $y = 2e^t$ , then  $\frac{dy}{dx} =$ :

(A)  $\frac{2e^t}{t}$ 

(B) e

(C)  $\frac{e^t}{t^2}$ 

(D)  $\frac{e^t}{t}$ 

59. The normal to the curve  $y = x^3$  at (1, 1) is:

 $(A) \quad x + y = 0$ 

(B) x + 3y - 4 = 0

(C) y-x=0

(D) x = 0

**60.** If  $A = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$  then  $A^2 = :$ 

(A)  $\begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$ 

(C)  $\begin{bmatrix} 1 & 1 \\ 0 & 0 \end{bmatrix}$ 

(D)  $\begin{bmatrix} 0 & 0 \\ 1 & 1 \end{bmatrix}$
